Information Session: Center For Talented Youth

What: On Saturday, November 16, we will learn about summer programs with the Center for Talented Youth (CTY). Run by Johns Hopkins University, CTY provides academic enrichment summer programs on many topics, including mathematics, science, engineering, humanities, and writing.

CTY is an amazing summer program—Dan based SPMPS on when he was at CTY. It is held on a college campus and you live in a dorm. The students there are some of the best students from around the country. You will spend 7 hours a day in class, taking the same class for all three weeks, so you learn a lot about the course you select. In the afternoons, there are two hours of activities. On weekends, there will be lots of fun activities: sports, dances, field days, a talent show, and more.

At this information session, we will discuss the application process. We will focus on their CTY Scholars program, which is a scholarship that would enable you to attend CTY programs from next summer through the end of high school, completely free! This is a big deal and we would love for all our SPMPS alums to come and hear more.

When: Saturday, November 16 from 1:30pm-3:00pm. Please be on time!

If you would like to stay until 5pm, we will be preparing for the SCAT, which is the exam that you will have to take to get into CTY.

Where: The Courant Institute of Mathematical Sciences at NYU, (also known as Warren Weaver Hall), 251 Mercer Street. This is where we held the pizza lunch last June. We will be in Room 102.

Nearby subways: N, R, (8th Street-NYU), B, D, F, M (Broadway-Lafayette), A, C, E, (W 4th Street), 6 (Astor Place)

Announcing: The SPMPS Math Team!

What: Math teams are an opportunity for students to hang out with their peers and work on interesting, challenging math problems. Many high schools will have math teams. SPMPS is starting our own math team and we want you to join!

At our first meeting of the math team, we will be preparing for the AMC 8. More information about the AMC 8 is on the next page. In short, it's a major math contest taken by kids all over the country and we want you to be prepared. Come to this math team meeting to get help from Dan on how to prepare for the contest, which is on the following Tuesday, November 19.

When: Saturday, November 16 from 3:30pm-5pm.

Where: The Courant Institute of Mathematical Sciences at NYU, (also known as Warren Weaver Hall), 251 Mercer Street. This is where we held the pizza lunch last June. We will be in Room 102.

Nearby subways: N, R, (8th Street-NYU), B, D, F, M (Broadway-Lafayette), A, C, E, (W 4th Street), 6 (Astor Place)
